

2019 Results and Highlights of Higher Education Sprout Project

Develop school characteristics	
Sub-project	Sub-project 2-1-3 for the research and development of innovative and creative cuisine for health care
Results and Highlights:	
<p>This project has held an industry expert seminar, a creative cooking competition, two learning outcomes presentation, and a dual-teacher teaching practice course. At the seminar, the outstanding industry expert demonstrated how to create innovative healthy cuisine by using Western cooking methods and local ingredients. Besides, we held a creative cooking competition and learning outcomes presentation to increase students' knowledge of local ingredients and improve their practical skills. In addition, for dual-teacher course, the collaborative teaching of industry experts and full-time teachers provides students with more opportunities to be familiar with the industry's practical operation standards in workplace.</p>
